

Clinical Systems Architecture & Executive Operations for Healthcare

Fractional & Standing CTO/COO • Platform Strategy • AI & Automation • Clinical Governance

Executive Services for Healthcare

Clinical Platform Architecture

FHIR-Native Platforms • SaMD Pathways • Enterprise Governance

We architect clinical governance platforms and lead platform modernization where clinical workflows, regulatory requirements, and enterprise scale intersect. FHIR-native design, HL7 interoperability, and SaMD regulatory positioning — from early-stage builds to large-scale vendor transitions.

Executive Operating Roles

Fractional & Standing CTO • COO • VP Clinical Systems

CTO, COO, and VP-level operating roles for health tech ventures and enterprise health systems. Enterprise product strategy, multi-site clinical operations, executive governance alignment, and the leadership bridge between clinical teams, technical architecture, and board-level strategy.

AI & Automation Strategy

RPA • API Orchestration • Predictive Models • Centers of Excellence

AI-driven automation embedded in clinical workflows. We design and launch Automation Centers of Excellence, build enterprise automation investment models, and deliver production automations across Epic, Oracle Health, payer portals, and specialty networks. 200+ production automations delivered. 2.1M+ annual transactions aligned to quantified ROI.

ABOUT THE FOUNDER

Casi Vician Ischay – CEO & Founder

Former Clinician. Board Director, Signature Health. Fractional and standing CTO/COO for health tech ventures and enterprise health systems.

Healthcare organizations struggle when clinical systems are fragmented, misaligned, or poorly governed – and when technical leadership doesn't understand clinical reality. I architect platforms and lead operations where clinical workflows, regulatory requirements, and enterprise scale intersect.

I take on a limited number of operating and advisory engagements – and selectively evaluate executive leadership opportunities with organizations whose mission and complexity align with my expertise.

Select Engagements

✓ **LORIMDT** – Founding Chief Technology Architect
FHIR-native clinical governance platform for complex oncology care. Technical architecture, product roadmap, ePRO Integration strategy, and regulatory positioning. Hope for Liver Cancer Foundation (501c3).

✓ **Trillium Health Resources** – VP Clinical Systems Operations
Enterprise stabilization and CMP replacement strategy under regulatory oversight. 40+ cross-functional stakeholders, \$5M+ vendor portfolio, 60,000+ members.

✓ **Eli Lilly** – Principal Digital Consultant
Enterprise data product and consent modernization. National-scale privacy-first personalization across AWS-based architecture.

Executive References

"An asset to any organization"

"I met the Founder and CEO of Lucas Health Tech when we were working on clinical systems together, which requires patience and attention to detail. She excels in each of these areas, and her leadership skills and application knowledge were valuable. It was a pleasure to work with her, and I would do so again. She would be an asset to any organization that uses her business solutions."

- Patrick Lake

Clinical Applications Manager, University Hospitals of Cleveland

"Superior clinical ops leader"

"I met the Founder and CEO when she was part of our enterprise transformation team and was a superior clinical operations leader. She not only had command of her technical skills, but she was also a strong communicator. Her peers and especially her customers loved her."

- Edward Marx

Former CIO, Cleveland Clinic & University Hospitals of Cleveland - CEO, Marx Advisory

"The right people"

"I worked with Lucas Health Tech's Senior Clinical Exec during my organization's first workflow automation pilot. I found her approach to be very helpful in introducing the project team and me to the world of AI. She took a thoughtful and professional approach to getting us aligned for our first automation. She did this through effective communication and having the right people provide the right answers when needed. While we did encounter internal issues with adjusting to new tech, her personal approach and expertise kept us on track and moving forward with a successful pilot project."

- Michael Neu, PMP

Senior Information Services Project Manager, UW Health
